Portfolio

https://linportfolio.vercel.app/

Core Skills

- UX Research
- Interaction Design
- User-Centred Design
- Accessibility & Inclusive Design
- Information Architecture
- Prototyping
- Usability Studies

Research Methods

- Human-Subject Research
- Participant Recruitment
- Experimental Design
- Usability Studies
- Behavioural Research
- Eye Tracking
- EEG / ERP
- Reaction-Time Studies
- Quantitative Analysis

Tools

- Figma
- Figjam
- Miro
- Maze
- E-Prime 2.0
- EyeLink 1000
- Brain Vision Analyzer
- SPSS

Education

MSc Cognitive Science

Technical University of Kaiserslautern

2016 – 2020

BSc Psychology

University of Cape Coast, Ghana

2009 – 2013

Professional Development

Google UX Design Professional Certificate

Google · Coursera

Completed

UXQB Certification

Exam preparation · In progress

User Experience: The Ultimate Guide to Usability and UX

Udemy

Completed

Languages

English	Native/Bilingual
German	B2

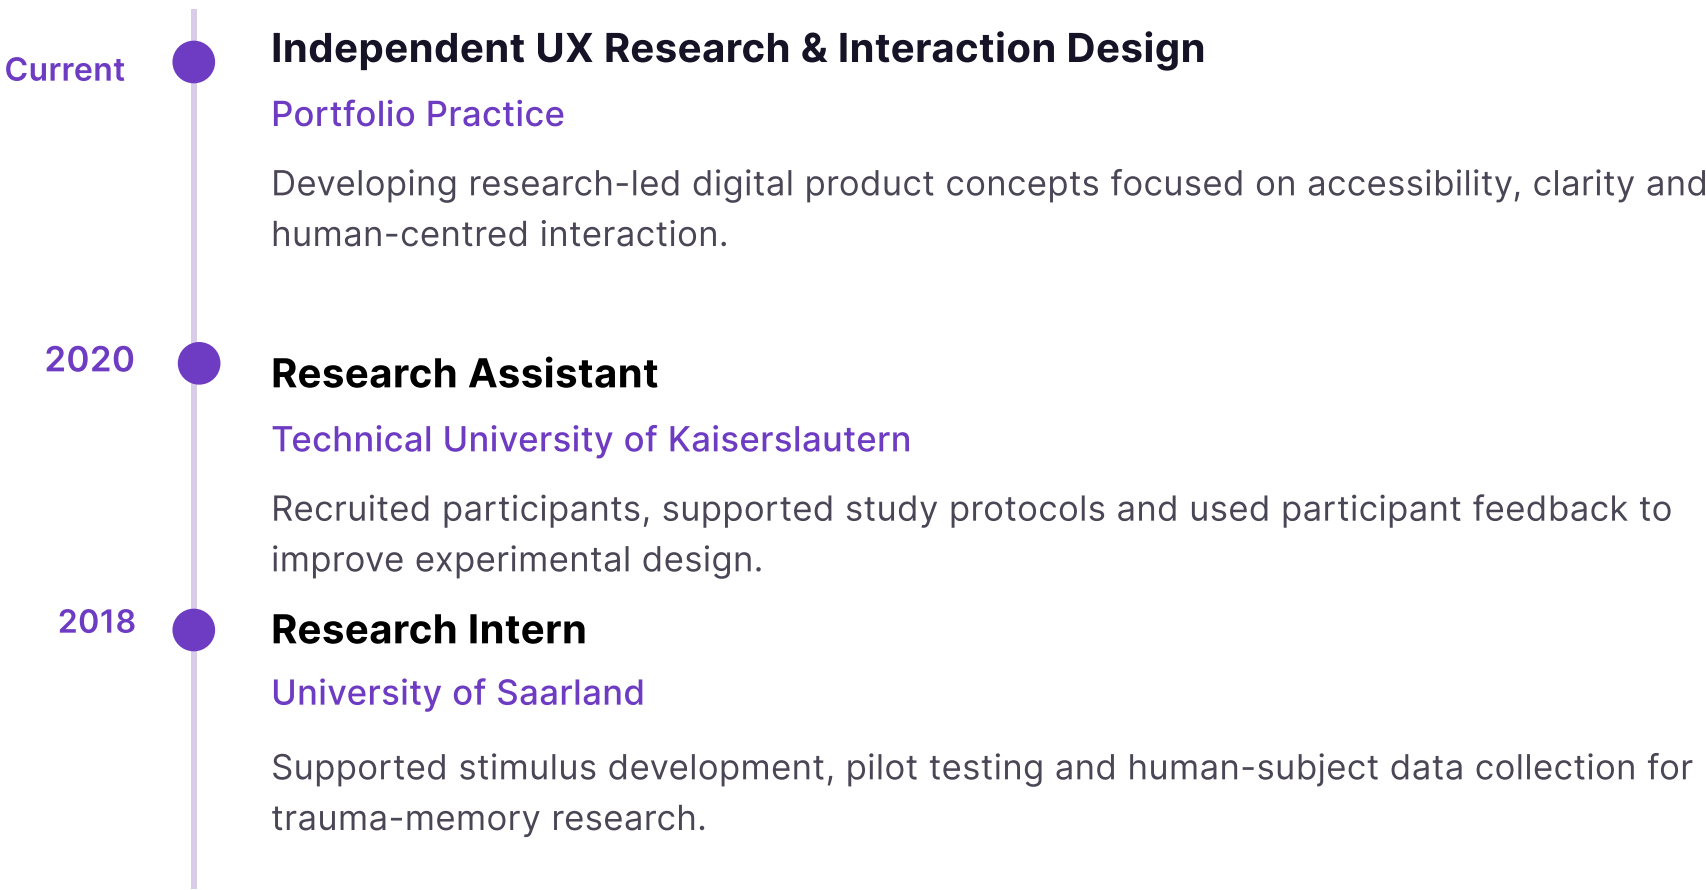

Linda Laryea

UX Researcher & Interaction Designer

Profile

UX Researcher and Interaction Designer with a background in Cognitive Science and Psychology. I design with cognition and emotion in mind, creating clear, accessible and user-centred digital experiences. I also completed the **Google UX Design Professional Certificate**.

Research & Professional Experience

Selected Research

Analytical Preference for Letters in Persons who are Literates

[Master's Thesis](#) · [Visual Cognition & Reading](#)

Human-subject study with 31 Ghanaian participants exploring how familiar letters and unfamiliar visual symbols are processed.

[E-Prime 2.0](#) · [SPSS](#) · [Reaction Time](#) · [Repeated-Measures ANOVA](#)

Reading Direction and Perceptual Span in Second-Language Reading

[Eye-Tracking Study](#) · [Visual Attention & Reading Behaviour](#)

Investigated whether first-language reading direction influences visual information uptake while reading in English as a second language.

[EyeLink 1000](#) · [Gaze Contingent Moving Window](#) · [R](#) · [Linear Mixed-Effects Model](#)

P300 Amplitude Differences in an Ultra-Rapid Categorisation Task

[EEG / ERP Study](#) · [Visual Categorisation & Cognitive Processing](#)

[EEG / ERP](#) · [32-Electrode Setup](#) · [Brain Vision Analyzer](#) · [SPSS](#) · [P300](#)

Selected UX Projects

Elysian Fields Attendance Kiosk

[UX Research](#) · [Interaction Design](#) · [Accessibility](#)

Designed an inclusive attendance experience to make staff check-in faster, clearer and more accessible through RFID and manual interaction flows.

[Research](#) · [User Flows](#) · [Wireframing](#) · [Prototyping](#) · [Inclusive Interaction](#)

Tasky — Family Organisation App

[UX Research](#) · [Interaction Design](#) · [Accessibility](#)

Designed a family organisation concept that helps households structure, prioritise and reschedule everyday tasks while reducing cognitive load.

[Research](#) · [Information Architecture](#) · [Task Flows](#) · [Prototyping](#) · [Accessibility](#)

AI Observability Tool

[UX Research](#) · [Interaction Design](#) · [Data Visualisation](#)

Designed an observability concept that helps users understand complex AI system behaviour through clear monitoring views, structured information and actionable workflows.

[Research](#) · [Information Architecture](#) · [Dashboard Design](#) · [Prototyping](#) · [Data Hierarchy](#)
